

## Specifications

voltage	DC 6V (4AA alkaline batteries)
power consumption	≤5uA (4AA alkaline batteries last 2 years based on 300 cycles a day)
sensor zone	17cm (the data based on 17cm*17cm standard whiteboard)
flush time	when you hands reached to the sensor zone,the water will come out automaticly,when your hand draw back the sensor zone,the water will closd.
hot and cold water temperature control	yes, the knob can adjust the hot and cold water
inlet and out let pipe dia.	G(1/2")
water pressure	0.05-0.8 Mpa
material and surface	Brass valve with chrome
